

WEAVER

weaverdemolition.com

**“I can highly
recommend Weaver
Demolition, they are a
very professional outfit and
a pleasure to work with.”**

WELCOME

Established in 1968, Bristol based Weaver Demolition has over 50 years' experience in the demolition industry, delivering a full range of demolition services throughout the UK.

We are a family run business and together with our dedicated, long-serving team, our aim is to deliver quality and value to our clients by using the very latest equipment and sound working practices. With all necessary skills available in-house, and no need to rely on external support, we can ensure that your project is delivered on time, without disruption.

Working in demolition, we recognise some of our activities may have an adverse impact on the environment and so we are committed to continual improvement of our environmental performance.

Our target is to recycle over 95% of all on site materials.

OUR SERVICES INCLUDE:

- Demolition Services
- Land Remediation
- Strip Out
- Crushing & Screening
- Asbestos Removal
- Temporary Works

Appointing an enabling works contractor for re-development or demolition projects is a big commitment. You need to know that you're choosing a reputable company that's established, trusted and dedicated to providing an integrated service with the highest level of expertise, health and safety and environmental knowhow. We provide all that, and support you through every step of the process.

WHY WEAVER DEMOLITION?

Weaver Demolition have been full members of our industry's leading body, the National Federation of Demolition Contractors (NFDC) since 1989, so you can be assured you're working with the best.

All of our operatives are Certificate of Competence for Demolition Operatives (CCDO) and Construction Plant Competence Scheme (CPCS) trained, and our accreditations in ISO9001, ISO14001 and ISO45001 standards ensure we are committed to upholding the Quality, Environmental and Health & Safety management of our business.

All Weaver Demolition employees receive Asbestos Awareness Training. They also hold a UKATA approved certificate for non-licensed asbestos removal together with a Face-Fit and Non-Licensed medical certificate.

WE OPERATE ACROSS A WIDE RANGE OF MARKET SECTORS, INCLUDING:

- Commercial
- Retail
- Healthcare
- Residential
- Educational
- Industrial
- Transport
- Urban

We're proud of our ability to deliver projects which solve complex client problems and add value to their development.

**“A great
company,
well run,
and a joy to
work with.”**

DEMOLITION SERVICES

Demolition of a building or structure requires careful consideration and the support of a dedicated company like Weaver Demolition. Depending on the size and position of the structure, its form of construction and its contents, we utilise a variety of demolition methods, to deliver a safe, cost-effective and environmentally friendly demolition project every time.

Our dedicated and highly competent team have a wealth of knowledge and experience in the industry and we use the very latest demolition equipment to deliver all projects to the client's satisfaction.

Prior to the commencement of every project, we prepare a comprehensive method statement and risk assessment to address any risk elements and provide a method to work to.

We're committed to identifying reclaimable and recyclable materials on site and selecting a suitable final destination. Once a building has been dismantled or demolished, we recycle the arisings – with a target to re-use and recycle over 95% of all materials. As well as minimising the environmental impact, this provides maximum value to our clients.

Weaver Demolition's team are accredited members of the Institute of Demolition Engineers (IDE). This demonstrates our engineering and technical knowhow within the demolition industry and the processes and methodologies we implement.

OUR SERVICES INCLUDE:

- Mechanical Demolition
- High Reach Demolition
- Airport Demolition
- Complex industrial de-construction
- Commercial developments
- Inner city regeneration
- Petrol Stations and Tank Demolition
- Bridge demolition and de-construction
- Robotic de-construction
- Structural alterations and refurbishment

LAND REMEDIATION

Weaver Demolition provide comprehensive land remediation services to assess your project, evaluate the risks and complete a safe, cost-effective remediation of your site. We eliminate environmental risks and ensure your site is safe to use.

Work begins with initial site investigation works by completing a materials management plan, outlining how materials will be safely handled and/or disposed of, deploy a dedicated project team to undertake the required work and complete a validation report, to ensure the land is safe to use so you can proceed with proposed developments.

We provide an extensive site clearance and bulk excavation service which offers a quick and efficient site clearance to excavate and remove all unwanted obstacles in order to prepare a site for landscaping or construction.

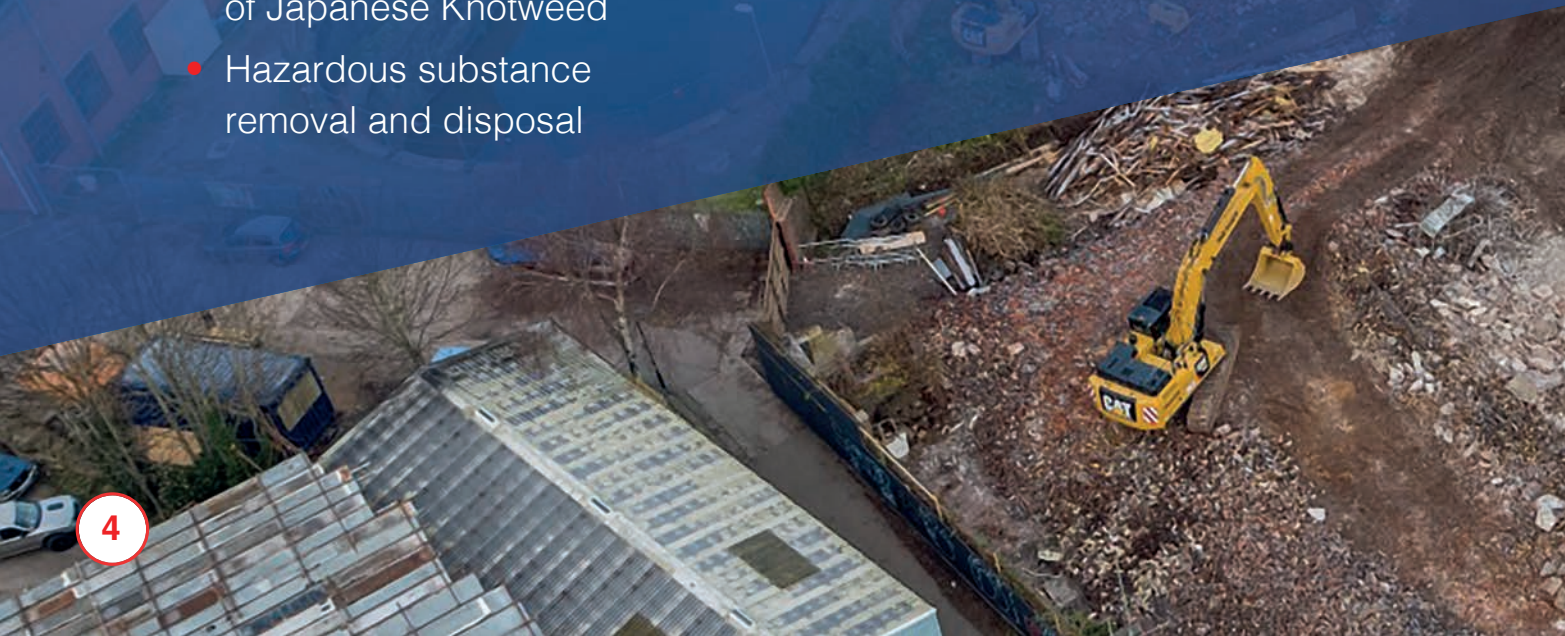

Our bulk excavation services are aimed at providing clients with a quality and affordable service.

OUR LAND REMEDIATION SERVICES:

At Weaver Demolition, we provide a one-stop shop when it comes to site remediation. Our services include:

- Identification and treatment of contaminated hotspots
- Treatment and removal of Japanese Knotweed
- Hazardous substance removal and disposal
- Management of archaeological dig projects
- Soil sampling, validation testing and soil stabilisation
- Geotechnical soil testing to establish compaction rates and enable the re-engineering of material
- Streaming and stockpiling of waste types for appropriate removal from the site

OUR STRIP OUT & INTERNAL DEMOLITION SERVICES:

All projects begin with a full consultation in order to fully understand your requirements. Our services include:

- Building de-commissioning: including disconnecting utilities, draining water supply and shutting down HVAC systems
- Removal, storage and transport of assets
- Intricate cut and carve internal demolition for structural modification of existing buildings
- Structural dismantling of walls, partitions, ceiling fixtures and fittings
- Design, provision and installation of temporary works to minimise disruption
- Decommissioning and disposal of waste with effective recycling and diversion from landfill

STRIP OUT & INTERNAL DEMOLITION

Whether it's a sole strip out project to enable the refurbishment of a building, or clearing out a building prior to demolition, Weaver Demolition have the knowledge and resource required to deliver your project.

Our dedicated teams have a wealth of knowledge and experience in planning and executing successful strip out projects in a wide range of buildings. From large occupied commercial spaces and hospitals to the smallest of offices, we strive to complete your project with as little disruption as possible.

CRUSHING & SCREENING AGGREGATES

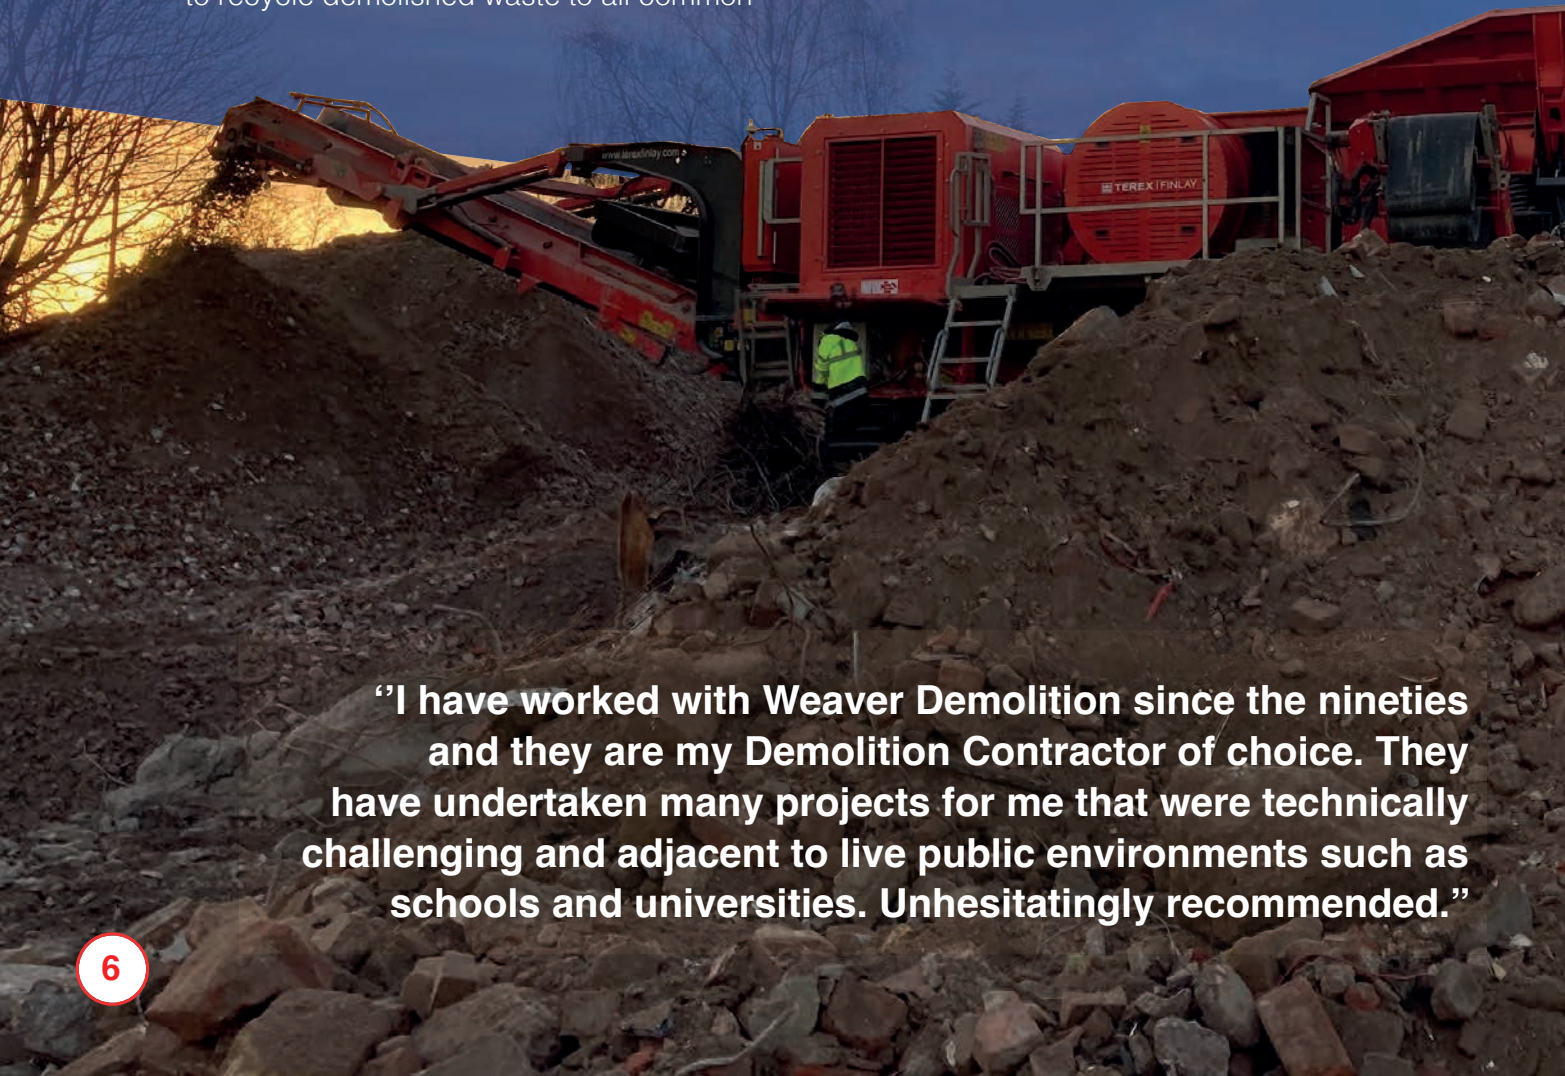

As part of our full enabling offering, we operate an efficient and cost effective crushing and screening service. Whether it be the processing of materials following demolition or a sole crushing contract, we have the facilities to maximise the value on your project.

Following the demolition of a site, removing all unwanted construction waste and buying in aggregates for a new build can prove costly. Crushing aggregates can make the process more cost-effective and sustainable. Our state-of-the-art machinery allows us to recycle demolished waste to all common

aggregate sizes, providing quality building materials ready for re-use to cut costs and reduce your carbon footprint.

Our concrete crushing services can be flexibly delivered, either as part of a complete demolition project or via individual concrete crusher hire. Our crushers are operated by fully trained and experienced personnel ensuring a seamless, safe and professional service, with sites left clean and tidy at the end of every project.

“I have worked with Weaver Demolition since the nineties and they are my Demolition Contractor of choice. They have undertaken many projects for me that were technically challenging and adjacent to live public environments such as schools and universities. Unhesitatingly recommended.”

ASBESTOS REMOVAL & SITE DECONTAMINATION

Weaver Demolition have valuable knowledge and experience in managing and carrying out the removal and disposal of asbestos materials. We follow tried-and-tested processes to ensure your site is free from asbestos and safe to use. That starts with a comprehensive survey to identify any hazardous materials on your site.

OUR ASBESTOS REMOVAL & REMEDIATION SERVICES:

With so much to consider, asbestos removal can be one of the more complex aspects of demolition and construction projects. Thankfully, Weaver Demolition's specialist team are fully trained and fully equipped to tackle every step of the asbestos removal process, including:

- Consultancy
- Pre-demolition surveys
- Site investigations
- Asbestos removal
- Site decontamination
- Thermal insulation removal
- Remedial works
- Air monitoring
- Hazardous waste management
- Emergency response services

Most importantly, all of our work is completed in line with the Control of Asbestos Regulations (2012) by competent and experienced personnel.

TEMPORARY WORKS

Temporary works can fulfil a range of vital functions on construction sites or commercial properties. From perimeter fencing to increase security to custom structures to stabilising adjoining properties during partial or whole demolition works. Whatever your requirements, Weaver Demolition will design, construct and install temporary works to maintain safety and minimise disruption.

OUR TEMPORARY WORKS SERVICES

At Weaver Demolition, we understand that no two temporary works projects are the same. Based on our wealth of experience, our services can include:

- Stabilisation of adjoining properties
- Façade retention
- Basement wall reinforcement
- Remaining structure support
- Site hoarding
- Perimeter fencing
- Piling mats
- Scaffolding
- Access bridges

“I have been using Weaver Demolition for 20+ years, Nothing is too much trouble and they will always work with you to deliver projects to programme, specification and cost’.”

A FULLY INTEGRATED SERVICE

Our service will be tailored to the specific requirements of your project. Every project begins with a thorough Structural Survey and Assessment. This must be carried out by an experienced contractor before work can begin — with Weaver Demolition you can be safe in the knowledge that we are exactly that.

Projects are often complex, with multiple elements needing to be managed in tandem to ensure the success of the project as a whole. We offer a cohesive enabling service, so you can rely on a single point of contact to cover every aspect, from decontamination to demolition to alteration works. With everything managed by one project manager, we deliver the best value and efficiency together with full health and safety, environmental and quality compliance.

Our professional accreditations include:

Cert No. 17583
ISO 9001
ISO 14001
ISO 45001
